

FERNANDO MOSQUEIRA

QA Specialist

fermosqueira@gmail.com | linkedin.com/in/fer-mosqueira | github.com/fermosqueira | fermosqueira.vercel.app

PROFESSIONAL SUMMARY

I spent five years auditing operational processes, costs and ERP data. That job left me with a genuinely useful obsession: finding where something breaks before it reaches anyone. I do the same thing with software now, as a QA Specialist at Light-it. I design test plans, validate APIs and document defects with full traceability. The automation side I've been building on my own, in personal projects. I get involved early in development, not once it's too late to fix anything. I use AI every day to speed up the tedious part of the job. The judgment is still mine.

TECHNICAL SKILLS

Testing	Functional Testing · API Testing · Regression Testing · Performance Testing · UX/UI Testing · Automated Testing
Tools	Playwright · TypeScript · Postman · Swagger · GitHub · Asana
Methodologies	Agile/Scrum · Bug Tracking · Test Case Design · AI-Driven Testing

PROFESSIONAL EXPERIENCE

QA Specialist Light-it | Sep 2026 – Present

- Joined Light-it, a software development company focused on digital health (healthtech), as a QA Specialist.
- Applying functional, regression and API testing in an agile setting, working closely with product and design.

QA Analyst ICONEXT | Aug 2024 – Aug 2026 (freelance)

- Designed and ran functional and non-functional test plans across frontend and backend, documenting critical defects with full traceability.
- Validated REST APIs with Postman and Swagger, verifying endpoint integrity, contracts and error handling.
- Ran exploratory and UX/UI testing, giving developers and designers actionable feedback.
- Managed the defect lifecycle in Asana, keeping traceability, SLAs and effective resolution on track.
- Took part in Agile ceremonies, bringing QA in from the early stages of development.

Process Control Analyst NAIF | Sep 2021 – May 2026

- Monitored operational process compliance, costs and delivery times, spotting deviations and coordinating corrective action.
- Analysed KPIs and drove data-focused continuous improvement initiatives.
- Validated information and documentation in ERP systems, guaranteeing accuracy and consistency of critical data.
- Coordinated resolution of operational incidents across departments, improving process traceability.
- Reviewed and updated internal procedures for standardisation and documentation quality control.

EDUCATION

Diploma in Software Quality Control — UNTREF (2024–2025)

Functional, API and automated testing · Test case design · Postman and Swagger · Agile methodologies · Traceability and continuous improvement.

Java Programming Course — GCBA (2018–2019)

Object-oriented programming · Algorithms · Desktop application development.

CERTIFICATIONS

Playwright 101 — TestMu AI (formerly LambdaTest) (Aug 2026) — End-to-end automation: selectors, auto-waiting, cross-browser testing, Page Object Model.

Anthropic Academy — Claude Code 101 · AI Fluency: Framework & Foundations · Claude Code in Action · Introduction to Agent Skills (Aug 2026) — Practical use of Claude Code, AI fluency and Agent Skills for AI-assisted development.

LANGUAGES

Spanish: Native · English: C1 · Advanced
